Press Release from Sheikh Jamal Al-Dhari - President

In light of the recent majority vote by The US Congress and Senate in support of the 9/11 Bill removing the Sovereign Immunity rights of Saudi Arabia and other Countries accused of being implicated in terrorism and -in spite of President Obamas veto on Sept 23rd 2016- we hereby declare that if this bill is actually passed and becomes a law then it constitutes a window of opportunity for millions of Iraqis who have lost their sons and daughters in military operations by US Military Forces and by US Contracted forces since the U.S. Invasion in 2003 to pursue compensation from the US government for what they have endured.

These US operations included bombings of civilians , arrests, torture (like in Abu Ghraib Prison) and in numerous camps set up by the U.S. Forces throughout Iraq. There are also tens of thousands of maimed and handicapped Iraqis as a result of this injustice.

The majority of the injustices were based on very sketchy information and very discriminatory methods with numerous admissions from US officials and ex-Officials.

Once the 9/11 Bill becomes law, we will endeavor and assist on a strong effort towards the formation of special committees seated by top Iraqi lawyers and Judges along with numerous International legal advisors .

We will also advocate reaching out to the regional and international societies to assist us in this honorable and necessary justice for the people of Iraq.

May God give us strength and his blessings to conduct this.

Sheikh Jamal Al-Dhari

INP, Iraq, 25.09.2016
