

There's no doubt that Fingerhutt will need to directly address OH. It will be very interesting to see hear what happens.

Is the talk completely off the record? As in, are you allowed to put your phone on speaker and record it somehow? I'd love to be able to get his voice with whatever he talks about, assuming that he's going to talk about us (someone is going to ask him)

Not sure if this is relevant, but there was a conference of some kind of Christian-Jewish relations group over the weekend, and apparently Emily Soloff, associate director for Interreligious Relations at the AJC, said something sympathetic about Open Hillel. Not really sure if that has much to do with this, and it sounds like it was sort of a passing reference, but I figured I would throw that out there.

Hello Open Hillel,

Tomorrow, AJC is scheduling a briefing about Israel on campus. That briefing (happening over the phone) is being delivered by none other than our dear friend Eric Fingerhut.

As your resident inside person, it will be my pleasure to listen in on the call, and pass along any and all things of relevance Fingerhut says to the listserv. I would like to underlie that this is a fascinating opportunity, since rarely do we get a chance to hear what Fingerhut says when he thinks no one is listening...

I wanted to give people an opportunity to suggest issues of particular relevance that they wanted me to listen for and take notes on. Please pass suggestions along so I know what to focus on.

Best,

Danny

Subject: Re: [open-hillel-organize] Important: AJC Getting Briefing from Fingerhut

Sounds great! Danny, I think it's important to say that even if it is technically legal and not immoral to record this, please don't feel any pressure to do so. That's up to you, and you understand dynamics at your work better than any of us do. But regardless this should be a great chance, as you said, to get a sense of what he's saying when he doesn't know anybody from OH is listening.

Danny- I'm assuming you have a smartphone of some sort. There are numerous apps you can download (free or very cheap) that record calls. You can even send the file to different people after the call.. Here's a link that gives numerous options to choose from and explains further--

+1 Aryeh

Yes, everyone will need to keep this confidential. This is an off the record briefing, and this is interesting mainly to be able to see what Fingerhut has to say behind closed doors.

There actually might be a recording of the call--since conference calls like this are often recorded for playback. I doubt I'll be able to get the file--and even if I did the off-the-record nature of the meeting makes it moot anyway.

At any rate, I'll be listening.

This is a very cool opportunity. Danny--make sure that everyone on the list keeps this confidential, so you don't get in trouble.
