GOC Issuance (2017) No. 94

The Decision of General Office of the Communist Party of China on Conducting Communication and Coordination Work between Our Country and the Democratic People's Republic of Korea for Further In-depth Solution of Its Nuclear Issue

International Liaison Department of CPC,

The Democratic People's Republic of Korea (abbreviated as Korea hereafter) is not only an important military buffer zone for our country to fend off the western hostile forces, but also, for socialism with Chinese characteristics led by our Party, its important political and strategic position is also irreplaceable. Therefore, our Party and country, must defend the sovereignty and territorial integrity of Korea at all costs and really ensure the stability and continuity of the Korean government, and unwaveringly stick to our position to firmly maintain peace on the Korean Peninsula. Given the fact that the Korean administration recently acted arbitrarily again to conduct the sixth underground nuclear test without fully consulting with us and created a huge negative impact on the international community because of this, the Security Council of the United Nations unanimously approved United Nations Security Council Resolution 2375 (referred as the Resolution hereafter) on September 11, 2017 local time to further punish and isolate the Korean administration. The result of the Resolution appropriately strengthened the punishment against the Korean administration. However it also aggravated the suffering of the general population inside Korea and further made the situation on the peninsula tending to be more complicated and ambiguous. In any sense, historical experience shows that terms or resolutions as such will not and are impossible to force the Korean administration to suspend or completely give up conducting nuclear tests. On the contrary, because of huge double pressure from both domestic and foreign sources, based on its own political and security concerns, the Korean administration will further consolidate its will and determination to continue its development of nuclear forces, and that will aggravate the vicious cycle of the situation on the Korean peninsula. Now, to further broaden and strengthen coordination and effectively deepen the solution of the Korean nuclear issue, according to the related decisions and arrangements for the Korean nuclear issue by the Party Central Committee and the State Council, and with the guiding spirit on handling the Korean-related issues from various meetings of the National Security Commission of the Communist Party of China, after research and assessment, the Central Committee of the Communist Party of China decided to authorize your department to lead and organize the communication and coordination work with the Korean administration on its nuclear issues. The specific requirements are as the following:

Your department should further emphasize to Korea about our determination to protect the Korean government on behalf of the Central Committee of CPC and reiterate and confirm the related assurance made by us. At the same time, your department should make further specific, profound, and detailed analyses for Korea on the current situation of the Korean Peninsula in exchange for Korea to make substantial compromises on its nuclear issues. According to the current deployment of world forces and the geographic position of the Korean Peninsula, to prevent the collapse of the Korean government and the possible direct military confrontation with western hostile forces led by the United States on the Korean Peninsula caused by these issues, our country, Russia, and other countries will have to resort to all the effective measures such as diplomatic good offices and military diversion to firmly ensure the peace and stability on the Korean Peninsula and to prevent "chaos and war," which is also the common position held firmly by our country, Russia, and others. Meanwhile, considering if the United States rushes to war against Korea, it will certainly have a huge influence and impact on the political and economic structure of the Asian Pacific region and even the whole world. At such a time, the security of Japan and (South) Korea can be hardly taken care of, especially the security of Seoul, the (South) Korean capital. Also, our country, Russia, and others will absolutely not look on the chaotic situation on the Korean Peninsula without taking any action. So taking the factors of various aspects into comprehensive consideration, theoretically the possibility does not exist that western countries led by the United States will carry out armed provocations and even overthrow the current Korean government via military means in order to solve Korean nuclear issues. However, international provocations by Korea via repeatedly conducting nuclear tests has imposed huge international pressure on our country which is continuously accumulating and becoming unbearably heavy. To show the position of our country as a responsible world power to firmly support the denuclearization of the Korean Peninsula and maintain the authority of its signed Treaty on the Non-Proliferation of Nuclear Weapons, while your department gives Korea a stern warning, you should also make further related assurances to Korea at the same time, that is, currently Korea will not have to immediately give up its nuclear weapons, and that so long as Korea promises not to continue conducting new nuclear tests and immediately puts those promises into action, our country will immediately increase economic, trade, and military assistance to Korea, and will add or continue providing the following benefits:

1. To greatly promote increasing trade with Korea to ensure the normal operation of the Korean government and raise the living standard of the Korean people. As for products under international sanctions such as crude oil products (except for the related products clearly defined as related to nuclear tests), under the condition of fully ensuring domestic demand of Korea, we will only make a symbolic handling or punishment.

2. After closing down Korean businesses in China according to the terms of the Resolution, our country will not for the moment restrict Korea from entrusting qualified Chinese agencies from trade with Korea or conducting related trade activities via third countries (region).

3. To further strengthen and increase assistance for the daily life and infrastructure building of Korea, 2018 related assistance funds will have a one-time increase of 15% more than 2017, and in the following five years, they will be increased each year by no less than 10% over the previous year .

4. Regulations that our country would suspend all banking business with Korea will only apply to state-owned banks controlled by the central government and some regional banks.

5. To increase investment in Korean defensive military construction and further provide Korea with high level military science and technology, such as more advanced mid- and short-range ballistic missiles, cluster munitions, etc., assisting in strengthening Korea's ability to maintain stability according to the stability maintenance experience of our country and Korean characteristics.

Your department should at the same time seriously warn the Korean authorities not to overdo things on the nuclear issue. Currently, there is no issue for our country to forcefully ask Korea to immediately and completely give up its nuclear weapons. Instead, we ask Korea to maintain restraint and after some years when the conditions are ripe, to apply gradual reforms and eventually meet the requirement of denuclearization on the Korean Peninsula. If Korea insists on acting arbitrarily, our country will further assess it and unilaterally impose specific punitive measures against Korean senior leaders and their family members.

This issue is about the peace and stability of the Korean Peninsula and the fundamental interests of our Party, our country, and all Chinese people, so your department should quickly cooperate with the Ministry of Foreign Affairs, the Ministry of Commerce, etc. according to the requirements of this decision and related spirit, to carefully make a related working plan, to ensure the sense of responsibility, to strictly maintain related confidentiality, and to seriously accomplish the heavy tasks entrusted by the Central Committee of CPC.

General Office of the Communist Party of China (seal)
