Hello,

Today is Wed Jan 17th. I just received your letter. I can't talk about my case but I can give you some updates. First I did receive Gender Affirming Surgery and Breast Augmentation on Apr.5th 2023. I began transitioning when I first got to San Quentin. I started hormones in 2009 shortly after being evaluated. Next, I have changed my name back to Skylar Deleon and I changed my middle name to Sophia. Just a name I have always loved. My transitioning was definitely tough but I have made it. Next, yes I am going to committee to transfer to a female facility. Right now though I am stuck in the prison hospital until I do my committee, which should be in the next few weeks. Your probably wondering where the name Preciosa Maciel come from? Good question. Maciel was my ex's last name and Preciosa was what he called me and became a moniker. But since we split I took my old name back and picked a middle name that I liked without outside pressure to change my middle name to what my ex called me. Just fyi if you write back you need to write under Skylar Deleon. That is my legal name. As for SB132 I should transfer fairly quickly but the prison makes us go to committee to determine whether or not which prison we go to even though I have had both surgeries. Right now I am being housed in the hospital for my safety. My counselor and Dr.s refuse to release me anywhere except Central California Women's Facility. I think that is about all I can update you on at this time. Next, as for you what is your purpose for wanting to know all the questions that you are asking? What is your position on everything? Please feel free to write back, but please understand that I can't write about anything to do with my case.

P.S. Who do you report for?
